At last night's board meeting, the WIMHF board of directors accepted your bid for rigging upgrades and repairs for Schooner Suva.

We would like to go forward with this project, with the addition of a second running backstay block, (the last item on the estimate), to replace the complementary block on the opposite side.

Please advise us of an anticipated timeline for proceeding with this project.

Thank you...

Jim Green, WIMHF VP and Suva Schedule Coordinator.
